

Feedback Report for Logiks General (Intermediate)

The report

This report describes how you performed on Logiks General (Intermediate). The information provided is confidential and intended for you, the respondent.

The test

Logiks General (Intermediate) is a general ability test and measures your ability to work with verbal, numerical and abstract information.

Results

Your results are shown, both for the overall assessment and for the verbal, numerical and abstract sections. For interpretation, your responses have been compared to those of a large group of people who have also completed the assessment. The comparison group used was Nederland WO 2.0

As different jobs and roles require different levels of performance, your results do not necessarily demonstrate your match to the role for which you applied.

Answer Patterns

The number of questions answered correctly, incorrectly and left unanswered is shown below the section scores.

Overall Score

Above Average

Speed and Accuracy

Your test taking style is based on the speed (number of questions attempted) and accuracy (percentage of questions answered correctly) with which you completed the assessment.

Your responses indicate that you worked as accurately as most, but answered more questions.
